

Notice Inviting e-Tender

Assam Forest Department proposes to install a waste paper recycling machine at Guwahati for eco-friendly disposal of waste paper generated in the offices. Bids are invited from manufacturers of paper recycling machines of various capacities for end to end conversion of waste paper to office stationary viz file covers and other forms of value addition to make the offices zero garbage zones and reduce carbon footprint. Processes having zero use of chemicals will be preferred. Details of installed capacity, space required, consumption of electricity (solar power option if available) and water, disposal and toxicity of waste water generated, manpower required, installations done, trainings to be imparted for running the equipment and value added products should be included. Unique features of equipment and environment friendly processes should be highlighted.
